

Good Vision

September 2021

Our Vision

950 million people worldwide need glasses but cannot afford them. As a result, children cannot go to school and adults cannot perform their work duties or provide for their families.

GoodVision USA would like to change this.

Our Mission

GoodVision USA seeks to assist those with poor vision and address the lack of trained optical specialists and high market prices for eye wear in our project country of Liberia. We train local GoodVision technicians to provide vision testing and correction to people without the means or access to proper eye care.

Everyone deserves the dignity and opportunity that comes with GoodVision.

GoodVisionGlasses

The extremely lightweight and flexible spring-steel wire frames, with the addition of decorative colored beads, make the eyeglasses both attractive and affordable. The selling price is around 2 - 3 times the typical local daily wage.

Our glasses are affordable for all!

Local Production

GoodVisionGlasses are manufactured locally on a simple bending machine without electricity. They can be produced anywhere, even in the most remote locations. Community producers earn a sustainable wage from the eyeglass frames they manufacture..

GoodVisionGlasses changes lives through improved vision and meaningful jobs

Your Contribution

Your generous donation of \$50 will help 10 people in Liberia receive the eye care and vision correction they need to thrive at school and work and in their everyday lives.

We welcome all contributions!

Meet Matee Yartu Morris

Matee is the Chief Officer in Charge of GoodVision USA projects at Refugee Place International (RPI), our partner medical clinic in Monrovia, Liberia. She works as an ophthalmic nurse and brings a wealth of experience in managing patient evaluations at the RPI clinic, as well as the outreach program at the eye camps in remote villages. Under her leadership, GoodVision technicians are trained and continually supervised. Matee's compelling motto is "Your Eyes – Your life!" which brings her commitment into clear focus.

Meet Favor Delphine Titus

Favor is a 6-year-old first-grade student who was sadly aware that she could not see clearly at school. Her parents brought her to Refugee Place International (RPI), our partner medical clinic in Monrovia, Liberia's capital city. She was tested by the GoodVision technicians and received wonderful new glasses to correct her vision problem, almost immediately. Favor and her parents are thrilled that she could get professional help so that she can now see clearly at school and at play!

Everyone deserves the dignity and opportunity that comes with GoodVision.

Meet the Team

Board of Directors
Blair Wong / President

Jack Peacock / Treasurer
Katherine Smith / Secretary
Karsten Wolf / Appointed Director
