

**Qualified
Partnership**

GoodVisionGlasses

According to a WHO study, more than 700 million people require glasses but cannot afford them. These people are unable to work, childrens' and adolescents' learning abilities are impaired. GoodVisionGlasses consist of a lightweight, flexible and stable spring steel frame and pre-ground polycarbonate lenses. We are currently active in 8 project countries and have already sold over 150,000 pairs of glasses globally. The glasses are adapted and sold directly on site. With the unique click system, customers can immediately take their customized glasses with them.

Qualified Partnership

The qualified partnership gives projects access to the affordable and high-quality GoodVisionGlasses. We supply you with produced frames and the appropriate glasses at cost price.

The **prerequisites** for a partnership are as follows:

- Eye tests are carried out by **qualified opticians or ophthalmologists**
- **Required permits** are available (import, sale, performance of eye tests etc.)
- Involvement of local partners

Starter packages

The packages provided by GoodVisionGlasses include:

- **500 frames** in the sizes S, M, L & XL
- **1,200 lenses** with -6.0 to +6.0 diopter (in 0.5 steps)

Upon request, you can also receive adjustment bars and eye charts for carrying out the mobile eye tests. Your opticians will be trained in customizing our frames.

The packages are available in the versions for "**adults**" and "**children and young people**".

These two versions each contain adapted sizes of the frames and thicknesses of the glasses for the respective customers.

We are happy to assist you with our experiences.

Contact
