## GoodVisionUSA brings eye testing and glasses to the Doe Community in Liberia

In August, trained GoodVision Technicians traveled to the Doe community, a northwestern suburb of Monrovia, Liberia to conduct long-awaited eye testing and dispense corrective eyewear. They were supported by medical staff from our partner NGO, Refuge Place International (RPI).

A large crowd of people showed up at the Doe Community Center and patiently waited for their turn, wearing protective masks against COVID-19. During the day-long outreach, GoodVision technicians examined or consulted with 50 patients. Refreshments were provided to ease the burden of waiting and eye testing was performed following the precise eye testing guidelines of GoodVision International.

Several patients with impaired eyesight were provided with GoodVision glasses, made from individually fitted frames (fabricated on GoodVision's simple bending machines) and lenses with the appropriate power for each patient.

**Imagine the joy this woman felt when she could see clearly!**

## **Your Contribution**

Your donation will help people in Liberia receive the eye care and vision correction they need to thrive at school and work and in their everyday lives.

**Give the joy of seeing!**
