

# Good Vision

April 2023

## What we've been up to lately...

Our Liberia team has been busy providing eye exams, distributing glasses, and planning future outreaches. Hear directly from some recipients about their experience with GoodVision.

The GoodVision clinic in Monrovia is open for business year-round. That means a customer like Linda, who first got glasses over a year ago, can be retested as needed and receive an updated prescription. Community-based care is integral to the GoodVision model.

**Meet one of newest volunteers...Brian Wong!**

Vision Expo East may have been a month ago, but we are still on a high! This year, we were able to demonstrate how GoodVision glasses are made thanks to our new volunteer, Brian Wong. Brian retired in 2016 after serving 36 years as a public employee for the Commonwealth of Massachusetts. After retiring, he started crafting wood toys, puzzles, and other small items for his grandchildren. It was this interest in working with his hands and "figuring out how things work" that led his brother, Blair Wong, to invite him to learn how to bend GoodVision frames. Brian jumped at the opportunity, believing in the mission and excited to contribute in a way that is well suited to his own interests and skills.

After teaching himself to bend eyeglass frames, he can't wait to demonstrate the process at future events. Our work is not possible without the excitement and work of volunteers like Brian!

---

### **In case you missed it...**

April is Women's Eye Health and Safety Month. Two out of every three people living with blindness or vision problems are women, and women have a higher prevalence of many eye conditions, including refractive error, cataracts, and glaucoma. Our GoodVision team in Liberia is working to ensure that women receive the eyecare they need and deserve.
